

LP® SOLUTIONS™ SOFTWARE

- The problem-solving CAD-based building software program
- Now includes Load Transfer
- Reduces manual entry for faster designs
- Unsurpassed design flexibility and ease of use
- Easy to learn, easy to use
- Faster, more accurate framing layouts and price quotes

*Better Building Begins Here***THE PROBLEM-SOLVING CAD-BASED BUILDING SOFTWARE PROGRAM**

LP® Solutions™ Software gives you the tools you need to create functional designs and maximize efficiency throughout the building process. Design and view in 2D and 3D, with “Walkthrough” and “Navigate” functions to move through 3D models.

NOW INCLUDES LOAD TRANSFER

Thanks to a series of checks and balances, LP Solutions Software helps you increase efficiencies for every phase of every project. Complete Load Transfer capabilities ensure you build with the strength you need.

REDUCES MANUAL ENTRY FOR FASTER DESIGNS

Use a customized builder’s template to facilitate efficiency, or import drawings and data in your choice of formats as your layout guideline.

UNSURPASSED DESIGN FLEXIBILITY

Move it, extend it, change it, rearrange it – everything in your design will maintain the proper relations and connections they need to, thanks to true parametric modeling. Plus, Options Management lets you create as many versions and variations of a design as you need.

EASY TO LEARN, EASY TO USE

Unlike some programs, the LP Solutions Software interface reflects the natural workflow of a real-world building. It takes you through each stage of design and construction step-by-step.

FASTER, MORE ACCURATE FRAMING LAYOUTS AND PRICE QUOTES

Thanks to LP Solutions Software, your price quotations and materials lists can be more accurate than ever. And by linking to machinery and accounting systems as well as other business software, you can streamline your operations to an unprecedented degree.
