1. PRODUCT AND COMPANY INFORMATION

- **Product Code:** Not applicable
- **Product Name:** Treated Engineered Wood Siding and Exterior Products
- **Brand Names:** LP SmartSide

LP Corporation, 414 Union Street, Suite 2000, Nashville, TN 37219
Telephone: 800.450.6106

2. COMPOSITION AND INGREDIENT INFORMATION

(1) Small amounts of waterbase paint and oilbase black stamp ink may be used to identify the product and to inhibit moisture ingress along board edges.

(2) PNOS: PEL-TWA = 15 mg/m³, total dust; PEL-TWA = 5 mg/m³, respirable fraction; TLV-TWA = 10 mg/m³ inhalable particulate, 3 mg/m³ respirable particulate.

3. HAZARDS IDENTIFICATION

**Emergency Overview**
- Contact with strong oxidizers or exposure to temperatures greater than 400° F may cause a fire.
- Smoke may contain carbon monoxide, aldehydes, and other toxic materials.
- Airborne wood and resin dust may explode when combined with an ignition source.

**Potential Health Effects (based on expected use of product)**
- **EYES:** Dust may irritate the eyes.
- **SKIN:** Dust may cause skin irritation.
- **INGESTION:** Not known.
- **INHALATION:** Dust can cause irritation to mucous membranes and the upper respiratory tract. Wood dust is considered a carcinogen.

4. FIRST AID MEASURES

- **EYES:** For dust exposure, immediately flush eyes with plenty of water for at least 15 minutes.
- **SKIN:** Wash with soap and water. Get medical attention if irritation develops or persists.
- **INGESTION:** Consult a physician.
- **INHALATION:** Remove to fresh air, consult a physician.

Note to Physicians: Exposure to dust may aggravate symptoms of persons with pre-existing respiratory tract conditions and may cause skin and gastrointestinal symptoms.
5. Fire Fighting Measures

Flammable Properties:
- Flash point: Not applicable.
- Combustible: Material may burn on contact with oxidizers or ignition sources.

Flammable Limits:
- Lower flammable limit: Not applicable.
- Upper flammable limit: Not applicable.

Autoignition Temperature: Typically 400-500˚F.

Explosion Hazard: Airborne concentrations of combustible dust, when combined with an ignition source, can create an explosion hazard if the dust concentration exceeds 30 - 60 g/m³.

Hazardous Combustion Products: Carbon dioxide, carbon monoxide, nitrogen oxides, aldehydes, cyanides, and other hazardous gases, vapors, and particles.

Extinguishing Media: Water, dry chemical and other agents rated for a wood fire (Type A fire). Use an extinguisher rated for a Type A fire.

FIRE FIGHTING INSTRUCTIONS: Evacuate the area and notify the fire department. If possible isolate the fire by moving other combustible materials. If the fire is small, use a hose-line or extinguisher rated for a Type A fire. If possible, dike and collect water used to fight fires. Firefighters should wear normal protective equipment (full bunker gear) and positive-pressure self-contained breathing apparatus.

6. Accidental Release Measures

Does not apply.

7. Handling and Storage

Handling: Provide ventilation or other measures so that dust levels are below the exposure limits listed in Section 2.

Storage: Keep dust away from ignition sources and store in a closed container. Consult NFPA 68 and 70 for additional information.

8. Exposure Control / Personal Protection

Engineering Controls: Control airborne dust concentrations below the exposure limits. Use only with adequate ventilation.

Respiratory Protection: When respiratory protection is required, or dust concentrations are unknown, use a NIOSH/MSHA approved air-purifying respirator for dusts.

Skin Protection: Wear work gloves to prevent skin irritation.

Eye Protection: Wear ANSI approved eye protection.

9. Physical and Chemical Properties

Boiling Point: NA
Melting Point: NA
Vapor Pressure: NA
Vapor Density: NA
Solubility in Water: NA
Density: 28 - 70 lb/ft³
PH: NA
Odor: Slight to none
Appearance: Light brown wood panels
10. Stability and Reactivity
CHEMICAL STABILITY: (CONDITIONS TO AVOID) Stable.
INCOMPATIBILITY: Keep away from high temperatures and strong oxidizers, such as concentrated nitric acid, oxygen, hydrogen peroxide, and chlorine.
HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide, hydrogen cyanide, and other products of wood combustion.
HAZARDOUS POLYMERIZATION: Will not occur.

11. Toxicological Information for Wood Dust and MDI
WOOD DUST
Wood dust is known to be a human carcinogen. An increased incidence of adenocarcinoma of the nasal cavities and paranasal sinuses was observed in studies of people whose occupations are associated with wood dust exposure. (10th Edition of the National Toxicology Program’s Report on Carcinogens) Wood dust from some tree species may induce sensitization.

MDI RESIN
CHRONIC (CANCER) INFORMATION: For typical products tested, MDI off-gassing is below the detection limit of 20 ppt. See Section 2 for carcinogenicity categories.
TERATOLOGY (BIRTH DEFECT) INFORMATION: NA
REPRODUCTION INFORMATION: NA
SENSITIZER: NA

12. Ecological Information
These wood products are not expected to pose an ecological hazard as a result of their intended uses.

13. Disposal Considerations
Dispose of waste according to local, state/provincial, and federal requirements.

14. Transportation Information
Hazardous Materials Table 172.101
Shipping Name: NA
Packing Group: NA
Hazard Class: NA
Placards/Labels: NA
Identification No.: NA
Special Provisions: NA

15. Regulatory Information
CERCLA RQ: NA
EPCRA EHS RQ Section 302: NA
EPA CAA Section 112(r): NA
EPCRA Section 313: NA
Uniform Fire Code: NA

16. Other Information
This MSDS is intended solely for safety education and not for use as specifications or warranties. The information in this MSDS was obtained from usually reliable sources and is provided without any representation for warranties regarding the accuracy or correctness. Since the handling, use, and storage is beyond our control, LP assumes no responsibility and disclaims liability for any loss, damage, or expense arising therefrom.
