ADVANCED DURABILITY FOR LONGER LASTING BEAUTY.
Featured: LP SmartSide Cedar Texture Shakes (Staggered), Panel (Board & Batten), Soffit, Trim & Fascia
With over 20 years of successful performance, it’s easy to see why the LP® SmartSide® brand is one of the fastest-growing brands of siding materials in the United States.

A PIONEER OF CHANGE

LP has redefined traditional building materials with treated engineered wood products that are designed to offer game-changing durability, beauty and workability. LP is a building industry leader in a category that is shaping the way homes, outdoor building structures, and light commercial properties are being built.

See the innovation that goes into making LP SmartSide products at YouTube.com/LPSmartSide.
A NATURAL DEFENSE AGAINST NATURE

All LP® SmartSide® products are treated to the core through our proprietary SmartGuard® process. With four components of protection, the SmartGuard process adds strength and helps LP SmartSide products withstand impacts, freeze/thaw cycles, high humidity, fungal decay and more.

See more about how LP SmartSide products are made at YouTube.com/LPSmartSide.

FOUR COMPONENTS OF PROTECTION

LP’s proprietary SmartGuard® manufacturing process ensures that every LP SmartSide Trim & Siding product is treated with an advanced formula of adhesive resins, water-resistant waxes and zinc borate, after which a water-resistant, resin-saturated overlay is bonded to the product. The result: four components of protection against water damage, termites and fungal decay.
OUTSTANDING IMPACT RESISTANCE

Testing shows that LP SmartSide strand products resist impact better than vinyl and fiber cement siding, which means they can stand up better against everything from everyday bumps to airborne storm debris. And because it doesn’t break as easily as fiber cement siding, LP SmartSide strand siding is also easier to handle and install, and results in less waste.

HAIL AND WIND RESISTANCE

Third-party test results demonstrate that LP SmartSide lap siding resisted hail damage better than fiber cement and vinyl. In fact, the LP SmartSide warranty covers impacts from hail up to 1.75” in diameter. LP SmartSide lap siding is also designed to withstand tough storms with wind gusts of up to 200 miles per hour. Refer to ESR-1301, Table 2B, Lap Siding.

RESISTANCE TO FUNGAL DECAY AND TERMITES

Since 1996, LP SmartSide strand substrate siding has undergone brutal testing in Hilo, Hawaii. An average temperature of more than 70 degrees, high levels of humidity, and almost 170 inches of annual rainfall make Hilo’s climate the perfect breeding ground for termites, moisture and fungal decay. Yet our Exterior Exposure Program continues to validate that LP SmartSide siding performs over time.

A STRONG WARRANTY BEHIND IT

LP has your back with an industry-leading, transferable limited warranty: a 50-year prorated limited warranty with a 5-year 100% labor and material replacement warranty.

*For complete warranty details visit LP Corp.com
WORKS THE WAY WOOD IS SUPPOSED TO

LP® SmartSide® treated engineered wood siding cuts out the time you spend dealing with warped and split pieces when properly stored and applied. Virtually every piece leaves the mill straight and ready to use. Plus, you’ll get lengths up to 16’, which may mean fewer seams and less waste to haul off the site.

MAKES BUILDING EASIER, FASTER, MORE EFFICIENT

LP SmartSide Trim & Siding cuts with standard woodworking tools, unlike fiber cement cladding that recommends expensive diamond blades. LP SmartSide products weigh less, resist breakage during handling, and make installation more efficient. Plus, all LP SmartSide products come pre-primed and ready to paint to help you save time.

LP HAS WORKABILITY NAILED

□ Works and cuts like traditional wood
□ Requires fewer tools
□ Weighs less, easier to carry, less breakage than fiber cement
□ Longer lengths may mean fewer seams and less waste

Watch our Building Science videos to see how LP makes treated engineered wood products last longer at YouTube.com/LPSmartSide.
A SMART CHOICE FOR OUR PLANET

LP® SmartSide® Trim & Siding are must-have materials to help builders qualify for green building programs. Plus, many homeowners and building owners are demanding sustainable products that have minimal impact on our environment.
We’re not just building for the future; we’re helping to protect it by using Sustainable Forestry Initiative® (SFI) certified forest management and fiber sourcing systems to help ensure that our wood comes from well-managed forests.

NATURALLY SUSTAINABLE
The LP SmartSide manufacturing process begins with wood, a renewable resource, grown and gathered under strict SFI standards. We target fast-growing trees and use 99% of the log for either the product or the fuel to make it. Plus, all binding agents and resins are low-emitting.

RESPONSIBLY MADE WITH WOOD
• Responsibly made with a renewable resource—wood
• 99% of the log is used
• Qualifies for green building programs

Learn more about LP’s environmental programs at LPCorp.com.
Siding texture plays a big role in a home’s curb appeal. That’s why LP® SmartSide® Trim & Siding is available in traditional cedar and smooth finishes that are both built with engineered wood strand technology. So whether you’re building a traditional craftsman or a modern masterpiece, you’ll be able to deliver the same advanced durability and longer lasting beauty.
CREATE YOUR OWN CUSTOM LOOK.

Choose your style. Choose your colors. Get the look you want. That’s the beauty of working with treated engineered wood. LP® SmartSide® products offer you the versatility to achieve stunning results with ease.

PICTURE IT BEAUTIFUL

LP SmartSide products offer homeowners the bold look of their signature cedar-grain texture in profiles that are always in style. It’s been the siding of choice for 20 years for homeowners who want uncompromising quality and distinctive curb appeal.
TRADITIONAL, BOLD, SUBTLE, DARING, MODERN

Create the look you want with a versatile selection of LP® SmartSide® products. Engineered to stand up to extreme weather, LP SmartSide Lap Siding is a natural, durable choice for structures in any region. Plus, it’s the perfect companion cladding for structures partially finished in stucco, stone and brick.

ATTENTION TO DETAIL

When you use LP® SmartSide® Shakes & Shingles on your projects, people will notice your attention to every detail. The beautiful aesthetic can be used for accents, gables or siding walls and will take curb appeal to the next level. It’s a must-have product for when you want your craftsmanship to stand out on any home, shed or light commercial building.

CEDAR TEXTURE SHAKES

PERFECTION SHINGLE

Please contact your local LP SmartSide sales representative for product availability.
PANEL THAT PERFORMS

Tough to the core, LP® SmartSide® Panel Siding is a treated engineered wood product that’s more durable, stable and consistent than traditional wood panels. It’s easy to recommend for light commercial, shed and residential applications that require a premium look and the toughness to combat extreme weather.

CEDAR TEXTURE PANEL

REVERSE BOARD & BATTEN

STUCCO TEXTURE PANEL

SMOOTH FINISH PANEL

STRONG, STYLISH VERTICAL SIDING

LP SmartSide Vertical Siding lets you re-create the charming appearance of board and batten while providing the added protection of the SmartGuard® process.

VERTICAL SIDING
OUTLINE YOUR VISION

LP® SmartSide® Trim & Fascia are the finishing touch that’s the first to get noticed. With its smooth finish or deep cedar-grain texture and variety of widths and thicknesses, you can add custom design accents that take curb appeal to the next level. LP SmartSide Trim is a must-have product for when you want your craftsmanship to stand out on any home, shed or light commercial building.

CEDAR TEXTURE TRIM

REVERSIBLE TRIM

NEW SMOOTH FINISH STRAND TRIM

Please contact your local LP SmartSide sales representative for product availability.
When you use LP® SmartSide® Soffit on your projects, people will notice your attention to every detail. You’ll get the same wood grain or smooth look that matches other LP SmartSide products in a soffit that’s pre-cut to the width you need. Vented soffits are also available with precisely cut, bug-resistant vents.
LP® SmartSide® Trim & Siding products come in a variety of styles, including smooth finish and cedar-grain textures, to help you create exactly the look you want. Use them on their own or to complement other claddings, such as brick or stone. They’re beautiful on homes and in other applications. With products this versatile, the possibilities are virtually endless.
Every homeowner wants a custom look that they can take pride in. They want a style that helps differentiate their new home from the one next door. LP® SmartSide® products give builders and architects the ability to design a signature look with a wow-factor that leaves a lasting impression.

LPSmartSide.com/Applications/NewHome
LP® SmartSide® products can help give any home a new life with their beautiful selection of styles and profiles. They easily transform homes from boring to bold with their rich cedar-grain texture. When you start using LP SmartSide products, it’s easy to see why homeowners love them and professional remodelers love to work with them.

**POPULAR CHOICES FOR REMODELING:**
- LP SmartSide Lap Siding
- LP SmartSide Cedar Texture Shakes
- LP SmartSide Trim & Fascia
- LP SmartSide Soffit

LPSmartSide.com/Applications/Remodel
LP® Outdoor Building Solutions® engineered wood products feature innovations that help offer more value to customers. With innovations like SilverTech® panel for a brighter and cooler interior and SmartFinish® overlay for a tough, attractive appearance, LP Outdoor Building Solutions products give you quality you can see inside and out.

LP® SmartSide® products come in different lengths, widths, textures, profiles and substrates, so there’s an ideal product for virtually any set of needs. Each option has its own unique combination of advantages. Find all those details and product specifications here.
CEDAR TEXTURE LAP

THE BOLD LOOK OF CEDAR WITHOUT MANY OF THE WORRIES

- One of the most durable lap siding options in the market today
- 16’ length can result in faster installation
- May create fewer seams than traditional 12’ siding
- Pre-primed for exceptional paint adhesion
- Self-aligning SmartLock™ option eliminates the need to measure and set lap reveal; eliminating this step in the process is likely to speed up the installation process
- APA-certified lap siding
- Treated engineered wood strand substrate

ALSO AVAILABLE IN FIBER SUBSTRATE

- CPA-certified lap siding
- Treated engineered wood fiber substrate

### Specifications: LP® SmartSide® Lap Siding

#### 38 SERIES CEDAR TEXTURE LAP (STRAND)
- 5.84 in., 6.84 in., or 11.84 in. (14.8 cm, 17.4 cm, 30.1 cm)
- 0.315 in. (8 mm)

#### 76 SERIES CEDAR TEXTURE LAP (STRAND)
- 5.84 in., 7.84 in., or 11.84 in. (14.8 cm, 19.9 cm, 30.1 cm)
- 0.375 in. (10 mm)

#### 76 SERIES SMARTLOCK CEDAR TEXTURE LAP (STRAND)
- 7.84 in. (19.9 cm)
- 0.375 in. (10 mm)
- 0.938 in. (24 mm)

#### 76 SERIES CEDAR TEXTURE LAP (FIBER)
- 5.84 in., 7.84 in., or 11.84 in. (14.8 cm, 19.9 cm, 30.1 cm)
- 0.375 in. (10 mm)

#### 76 SERIES SMARTLOCK CEDAR TEXTURE LAP (FIBER)
- 5.84 in., 7.84 in., or 11.84 in. (14.8 cm, 19.9 cm, 24.1 cm)
- 0.375 in. (10 mm)

#### 120 SERIES SELF-ALIGNING CEDAR TEXTURE LAP (FIBER)
- 7.92 in. (20.1 cm)
- 0.450 in. (11 mm)

*Cedar texture shakes offer more options for the designer and craftsman. We've included coverage for the two most common applications, 9˝ and 10˝ exposures, for your convenience.*
Specifications: LP® SmartSide® Shakes & Shingles

PERFECTION SHINGLE

A TRADITIONAL, SUBTLE LOOK

- Features fine sawn wood texture with no knots
- Balance of cedar like texture and the clean lines of shingles with a 5.5” to 6.5” reveal
- Beautiful aesthetic for accents, gables or siding walls
- Pre-primed for exceptional paint adhesion
- Perfect for a wide range of applications

Specifications: LP® SmartSide® Panel Siding

**CEDAR TEXTURE PANEL**

**RATED FOR STRUCTURAL USE BY APA®**
- Shiplap edges with advanced bead system for easier alignment
- Pre-primed for exceptional paint adhesion
- Significantly lighter than comparable fiber cement panel
- Strong enough to be nailed directly to stud, making additional sheathing unnecessary in many applications
- Eliminates need for additional bracing on load-bearing walls
- Ideal exterior for homes in areas of high winds or seismic activity
- Treated engineered wood strand substrate

**ALSO AVAILABLE IN FIBER SUBSTRATE**
- Not rated for structural use
- Treated engineered wood fiber substrate

**GROOVE DETAIL**

**38 SERIES CEDAR TEXTURE PANEL 8” O.C. (STRAND)**

**76 SERIES CEDAR TEXTURE PANEL 4” & 8” O.C. (STRAND)**

Specifications: LP® SmartSide® Trim

REVERSIBLE TRIM (FIBER)

TWO GREAT LOOKS IN ONE

- The natural look of cedar texture on one side and smooth finish on the other
- Interior or exterior use, including corner boards, windows and doors
- Pre-primed for exceptional paint adhesion
- 16’ length can result in faster installation and fewer seams
- Reversible trim has a 1/8” bevel cut on its cedar texture side and is square cut on the smooth finish side
- Treated engineered wood fiber substrate

SMOOTH FINISH TRIM (STRAND)

SMOOTH APPEARANCE, ADVANCED DURABILITY
OF ENGINEERED WOOD

- Advanced Durability for Longer Lasting Beauty™
- Holds up in extreme weather including moisture, hail, freeze/thaw cycles, and up to 200 mph wind gusts
- Treated with the SmartGuard® process for superior protection against the weather, fungal decay and termites
- 16’ ft length can result in faster installation and fewer seams
- Pre-primed for exceptional paint adhesion
- Backed by an industry-leading 5/50-year limited warranty
- Treated engineered wood strand substrate

440 SERIES SMOOTH FINISH TRIM (STRAND)

Specifications: LP® SmartSide® Soffit

CEDAR TEXTURE SOFFIT

THE FINISHING TOUCH
- The perfect alternative to MDO and plywood soffits
- Cut-to-width eliminates time spent ripping full sheets
- 38 Series engineered for closed soffit applications
- The 76 Series and 190 Series are ideal for use as the starter course for roofs with exposed eaves
- Treated engineered wood strand substrate

ALSO AVAILABLE IN FIBER SUBSTRATE.
- Not rated for exposed eave applications
- Engineered for closed soffit applications
- Treated engineered wood fiber substrate

38 SERIES 4’ x 8’ CEDAR TEXTURE SOFFIT (STRAND)
- 0.315 in. (8 mm)
- 47.88 in. (121.6 cm)

76 SERIES 4’ x 8’ CEDAR TEXTURE SOFFIT (STRAND)
- 0.375 in. (10 mm)
- 47.88 in. (121.6 cm)

190 SERIES 4’ x 8’ CEDAR TEXTURE SOFFIT (STRAND)
- 0.530 in. (14 mm)
- 47.88 in. (121.6 cm)

38 SERIES CEDAR TEXTURE SOFFIT – CUT-TO-WIDTH (STRAND)
- 0.315 in. (8 mm)
- 11.94 in., 15.94 in. or 23.94 in. (30.3 cm, 40.5 cm or 60.8 cm)

76 SERIES CEDAR TEXTURE SOFFIT – CUT-TO-WIDTH (STRAND)
- 0.375 in. (10 mm)
- 11.94 in. (30.3 cm)

76 SERIES CEDAR TEXTURE SOFFIT – CUT-TO-WIDTH (FIBER)
- 0.375 in. (10 mm)
- 47.94 in. (121.8 cm)

**Specifications: LP® SmartSide® Soffit**

**VENTED SOFFIT**

**ENGINEERED TO CUT OUT PROBLEMS**

- The perfect alternative to MDO, plywood or hand-installed metal vents
- Precisely cut vents offer 10 square inches of ventilation per linear foot, making it easier to meet code requirements while adding architectural beauty
- Designed to minimize paint build-up and promote continuous airflow
- 1/8” vents to help keep hornets and bees out
- Eliminates time spent ripping full sheets
- Treated engineered wood strand substrate

START STRONG WITH
LP BUILDING SOLUTIONS

Inventing a Better Tomorrow with LP
LP’s mission is to engineer extraordinary solutions for everyday problems. With a united spirit of
discovery, LP is forging ahead with innovative ideas to create new products that offer exceptional
performance for today’s building challenges.

LP® ArmorStrand® Panel Substrate
Under Textured Finish Coatings
LP ArmorStrand substrate is engineered to deliver a strong foundation to help create the look of stucco
with durable acrylic finishes. It’s toughness you can build on with confidence.

LP® FlameBlock® Fire-Rated Sheathing
LP FlameBlock Fire-Rated Sheathing has structural design values equal to standard sheathing in the same
performance category. ICC-certified (ESR-1365) per AC264 with a Class A and 30-minute Flame Spread
Rating (ASTM E84), it combines fire resistance and impressive structural performance in a single panel.

LP® TechShield® Radiant Barrier
The original, #1 brand of radiant barrier, LP TechShield Radiant Barrier may reduce monthly cooling costs
by blocking up to 97% of the radiant heat in the panel from emitting into a home’s attic, lowering attic
temperatures by up to 30° F.

LP Legacy® Premium Sub-Flooring
LP Legacy sub-flooring uses Gorilla Glue Technology® for one of the strongest, stiffest sub-floors.
The resin in Gorilla Glue Technology binds wood fibers at the molecular level for premium performance.
