LPShed.com
Pioneers in Innovation

LP Building Products, one of the world’s largest producers of oriented strand board (OSB) panels, was founded in 1973. It’s a company that has pioneered innovations like the treated engineered wood used in LP® SmartSide® Trim and Siding.

LP proudly offers a complete line of products to help you manufacture better outdoor structures with outstanding durability, value, beauty and flexibility for your business.
How Treated Engineered Wood Trim And Siding Are Made

### Treated Engineered Wood Strand

LP incorporates continuous quality control and testing measures during the manufacturing process.

A warm water bath is used to soften the logs and ensure a consistent product regardless of the time of year.

The SmartGuard® process adds zinc borate, high-strength resins and a moisture inhibitor.

When the bark is removed, LP uses it to generate steam used in the manufacturing process.

Throughout the next steps, the logs are stranded and the strands are separated by sizes.

After a protective overlay is applied, the material is heated and pressed, cut to product width and eventually sent for delivery.

The SmartGuard-treated strands are then specifically layered for the most durable product available.

### Treated Engineered Wood Fiber

LP incorporates continuous quality control and testing measures during the manufacturing process.

Wood chips are screened to maintain the specified size classification.

Warm water washes the wood chips to ensure a consistent product year-round.

Wood chips are refined to fiber bundles to enhance consistency.

The product is cut to shape, primed and packaged for delivery.

After the protective overlay is applied, the material is heated and pressed, baked and humidified.

The SmartGuard process adds zinc borate, high-strength resins and a moisture inhibitor.
Treated to the Core with the SmartGuard® Process

Every LP® SmartSide® product is manufactured with our proprietary SmartGuard process to help resist damage from harsh environments, fungal decay and termites.

Four Components of Protection

**Waxes**
Special water-resistant waxes coat each strand or fiber of wood for enhanced durability in rainy, humid environments.

**Resin-Saturated Overlay**
Resin-saturated overlay resists moisture intrusion while providing a durable base for quality paint adhesion and beauty.

**Zinc Borate**
Effectively resists damage from termites and fungal decay for decades, helping to preserve the integrity of LP SmartSide Trim and Siding. Zinc borate has been used safely for decades in common household items such as paper, carpet and paint.

**Advanced Binders**
Provide strength to help resist impact damage from everyday airborne debris such as sticks and golf balls.

Tested to the Extreme in Hilo, Hawaii Since 1996
LP® SmartSide® products have proven their toughness after 20 years in a harsh tropical environment.

**Intense Humidity**
**170" Annual Rainfall**

**High Formosan Termite Population**

**Ideal Conditions For Fungal Decay**

Engineered for Extreme Workability
All LP SmartSide products are made with treated engineered wood and can be cut with standard woodworking tools. You’ll get the workability of using an easy-to-handle building material with the added benefits of exceptional strength and durability.
LP believes in protecting the environment and embracing the challenges to build sustainable economic prosperity. That’s why we actively invest in managing renewable resources.

LP uses SFI-certified forest management and fiber sourcing systems to help ensure that our wood comes from well-managed forests. We invite you to learn more about LP’s comprehensive environmental programs by visiting LPCorp.com.
Give Your Customers More with Innovative LP Products

LP® Outdoor Building Solutions® treated engineered wood products feature innovations that help your sheds last longer and offer additional benefits. With innovations like LP® SmartSide® Panel with SilverTech® for a brighter and cooler interior and LP® ProStruct® Floor with SmartFinish® for a tough, attractive appearance, LP Outdoor Building Solutions products give your customers quality they can see inside and out.

*LP SmartSide Panel with SilverTech and LP ProStruct Floor with SmartFinish are for non-residential use only.

THE LOOK OF A BRIGHTER, COOLER SHED

LP® ProStruct® Roof Sheathing With SilverTech®

LP ProStruct Roof Sheathing with SilverTech® features a durable radiant barrier that helps keep sheds or other outdoor structures cooler in the summer heat. With its highly reflective, professional-grade appearance, LP ProStruct Roof Sheathing with SilverTech helps brighten the inside for better visibility.

- Helps keep the shed cooler inside
- Highly reflective surface brightens the interior
- Premium finish resists peeling and flaking
- Uniquely designed for use in outdoor structures

20-year prorated, limited warranty on substrate**

*LP ProStruct Roof Sheathing with SilverTech is for non-residential use only.
**See LPShed.com for complete warranty details.
Roof Sheathing

Radiant Barrier Helps Reflect the Sun’s Heat

- Reduces the sun’s radiant energy through the shed roof panel
- Helps keep the shed cooler for storing items or working inside
- Highly reflective surface helps enhance lighting
- Label-free, professional-grade finish resists peeling and flaking
- Cuts with standard woodworking tools for easier installation

**LP® SmartSide® Panel Siding**

LP SmartSide Panels offer the workability, durability and beauty you would expect from LP. It’s a smart choice when you want a shed product that comes backed with an outstanding limited warranty.

- Desirable upgrade from T1-11
- Treated engineered wood technology for long-lasting performance in tough climates
- SmartGuard® treatment for protection against fungal decay and termites
- Resistance to warping, splitting and cupping
- Free of knots, patches and face voids
- Offers exceptional impact resistance

**5-year, 100% labor and material replacement feature**

**50-year prorated, limited warranty on substrate**

To achieve the Board & Batten profile, pair PID Number 25856 or 25858 (Panel) with PID Number 25877 (Trim).

For more information, contact your local LP sales representative.

*See LPShed.com for complete warranty details.*
LP® SmartSide® Panel Siding With SilverTech®

Innovative LP SmartSide Panels with SilverTech* feature all of the benefits of LP SmartSide Panel Siding plus a radiant barrier for a finished look that resists flaking and peeling. It’s an ideal material choice when you want brighter interiors when building sheds to be used as workshops or playhouses.

*LP SmartSide Panel with SilverTech is for non-residential use only.

**See LPShed.com for complete warranty details.

Specifications: LP® SmartSide® Panel Siding

Cedar Texture Panel

Rated For Structural Use By APA

- Pre-primed for exceptional paint adhesion
- Strong enough to be nailed directly to stud, making additional sheathing unnecessary in many applications
- Eliminates need for additional bracing on load-bearing walls
- Ideal exterior for outdoor buildings in areas of high winds or seismic activity
- Treated engineered wood strand substrate

Metric units are rounded to the nearest millimeter.

LP® SmartSide® Lap Siding

With its beautiful wood-texture finish, LP SmartSide Lap Siding is an attractive option for building premium sheds that complement customers’ homes. You’ll have the versatility to create a wide range of looks and put your craftsmanship on display.

- Gives the look of real craftsmanship
- Free of knots, patches and face voids
- Excellent resistance to warping, splitting and cupping
- Offers superior impact resistance
- Treated engineered wood technology for long-lasting performance in tough climates
- SmartGuard® treatment for protection against fungal decay and termites

5-year, 100% labor and replacement feature*
50-year prorated, limited warranty on substrate*

*See LPShed.com for complete warranty details.
Specifications: LP® SmartSide® Lap Siding

Cedar Texture Lap

The Bold Look Of Cedar Without Many Of The Worries

- One of the most durable lap siding options in the market today
- 16’ length can result in faster installation
- Fewer seams than traditional 1/2’ siding
- Pre-primed for exceptional paint adhesion
- Self-aligning SmartLock™ option installs faster and more efficiently
- Treated engineered wood strand substrate
- APA-certified lap siding

CREATE YOUR SIGNATURE LOOK

LP® SmartSide® Trim

LP SmartSide Trim can help give your shed the look of real craftsmanship. With trim available in wide and narrow widths, and smooth and textured finishes, you can create the style you want to help your shed stand out from the rest.

- Ideal for corner boards, fascia and trim around windows and doors
- Smooth or cedar texture trim to achieve the style you want
- Free of knots, patches and face voids
- Excellent resistance to warping, splitting and cupping
- Treated engineered wood technology for long-lasting performance in tough climates
- SmartGuard® treatment for protection against rot and termites

*See LPShed.com for complete warranty details.

5-year, 100% labor and replacement feature*
50-year prorated, limited warranty on substrate*

Can also be used to achieve the Board & Batten look (PID Number 25877)
Specifications: LP® SmartSide® Trim & Fascia

Cedar Texture Trim

The Classic Appearance Of Cedar

- Interior or exterior use, including corner boards, windows and doors
- Narrow widths save cutting time with no ripped edges to reprime
- Pre-primed for exceptional paint adhesion
- 16' length can result in faster installation and fewer seams
- Treated engineered wood strand substrate

PUTTING YOUR BEST FOOT FORWARD

LP ProStruct Floor with SmartFinish

LP ProStruct Flooring with SmartFinish™ features a durable overlay for a beautiful, professional-grade appearance on sheds and other outdoor structures. With no knots or voids, it’s a welcome change from building with traditional plywood flooring. Plus, unlike plywood shed floors, LP ProStruct Floors with SmartFinish are treated with the SmartGuard® process for longer-lasting performance in tough climates.

• Treated engineered wood technology for enhanced substrate durability
• SmartGuard treatment for protection against fungal decay and termites
• Beautiful, tough overlay for a premium appearance
• Free of knots, patches and face voids
• Excellent resistance to warping, splitting and cupping

1-year, 100% labor and replacement feature**
10-year prorated, limited warranty on substrate**

*LP ProStruct Floor with SmartFinish is for non-residential use only.
**See LPShed.com for complete warranty details.
Floor

Your Team for Success

The LP Outdoor Building Solutions team is always looking for ways to help make building and selling sheds easier for you. With Field Marketing Representatives across the country, we look for opportunities to provide one-on-one support that makes a meaningful difference to your business.

Marketing Support and Merchandising

LP is committed to helping builders and dealers who sell sheds built with LP products to grow their business. We provide in-depth marketing and merchandising assistance to help you attract customers and close more sales.

LP Outdoor Building Solutions support includes:

- Cooperative demand creation campaigns
- Engaging point-of-sale merchandising material

Local Marketing That Targets Your Customers’ Concerns

- Support keeps the message relevant to your customers’ questions
- Creates differentiation by emphasizing that LP products are not oriented strand board (OSB)

Connecting with Customers

- LP Outdoor Building Solutions point-of-sale items highlight key features inside and out
- Provide useful information to customers who say they are just looking
- Supports events to help increase sales
- Offered to dealers free of charge

If you have any questions, please contact an LP Outdoor Building Solutions team member by calling **844.5LP.SHED** (**844.557.7433**).

Engineered for Building It Better

For more than 40 years, LP has pioneered innovative building materials that look great and stand up to the elements. With a broad portfolio of products, LP is committed to delivering unparalleled quality, service and value.

**LP® Oriented Strand Board**

Uniform, strong, dense and easy to work with, LP OSB takes nails, screws and fasteners with confidence.

**LP® SolidStart® LSL**

Engineered to outperform traditional lumber, LP SolidStart LSL offers superior strength for greater load-bearing capacity.
