

LP® Concrete Forming Products

BUILD WITH US.

Why Choose LP Building Products

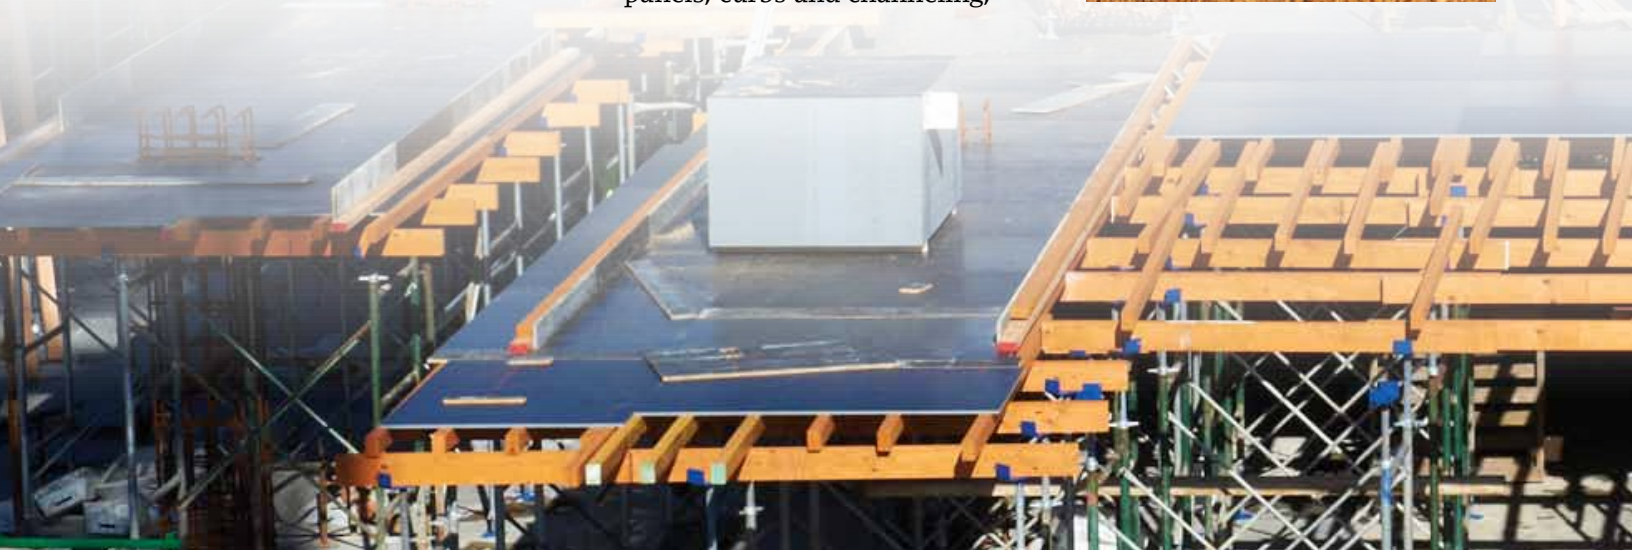

LP Building Products has been in the business of manufacturing oriented strand board products since the early 1980s. Over the years, we've learned a few things about taking wood fiber apart and putting it back together again. We combine our extensive experience in flaking, drying and sorting with the latest developments in adhesives and pressing to create a product with superior strength, uniform properties, and high fastener holding ability.

Concrete & Engineered Wood, A Natural Fit

LP® Concrete Forming Products are smart, engineered alternatives to solid timber. If consistency, reliability, and installation speed matter, we have the right products for your job. The LP family of Concrete Forming Products resists cupping and warping so whether it's used for slabs, footpaths, tilt-up panels, curbs and channeling,

or concrete form beams, you'll have more even and consistent surfaces to work from and a better finished product.

LP® LVL Edge Form

LP® LVL Edge Form is engineered for added stability by placing the third ply in from each face perpendicular to the length of the board.

- Consistent, accurate sizes
- Strong, straight and durable
- Resists warping, cupping and shrinkage
- Multiple reuses
- Available in long lengths
- Can be customized to meet your needs

LP® LSL Edge Form

LP® LSL Edge Form is engineered for reliability. You can count on it to deliver a consistent, even pour.

- Consistent, accurate sizes
- Strong, straight and durable
- Resists warping, cupping and shrinkage
- Multiple reuses
- Available in long lengths
- Available in standard 35mm thickness
- Can be customized to meet your needs

LP® LVL Concrete Forming Beam

Engineered to be stronger and more consistent than solid timber, LP® LVL Concrete Forming Beams can carry a heavier load over longer spans.

- Dimensionally stable
- Resists warping, cupping and shrinkage
- Chamfered edges for ease in handling
- SiteCote™ protective coating on all six sides for increased moisture protection
- Quality product providing consistent performance

LP® ArchForm™ Concrete Edge Form

LP® ArchForm™ Concrete Edge Form is a screen back engineered wood panel for use in low pressure concrete forming applications.

- Flexible and well-suited for radius forming applications
- Can be curved to fit the contours of formed concrete projects
- Strong and durable
- Resists warping, cupping and shrinkage

Conserve. Create. Renew.

At LP, our approach to the environment can be summed up with three words: conserve, create and renew. As a leader in the building products industry, we view it as our responsibility to be good stewards of the environment and to develop and manufacture products that help builders build better homes.

To us, “green” is about conserving natural resources, creating products that help builders reduce waste, and finding ways to utilize renewable energy sources and reduce waste throughout our operations.

To ensure that we are being good stewards when it comes to our use of natural resources, we participate in the Sustainable Forestry Initiative® (SFI) and the Programme for the Endorsement of Forest Certification (PEFC), which promote sustainable forestry management.
