

SOLIDSTART™

LP® SolidStart™ Laminated Strand Lumber (LSL) 29mm Rim Board

Better, All The Way Around

Ideal for supporting high vertical and lateral loads as part of a complete floor or roof framing system, LP® SolidStart™ LSL Rim Board products are precision cut to work perfectly with LP SolidStart I-Joists as well as LVL and LSL beams. Specifically sized for UK builders, they offer high strength and high fastener capacities – with far less splitting than conventional timber products. Backed by a Lifetime Limited Warranty, they're the right choice for the way the UK builds today.

Go With The Leader

LP is the leader in strand technology across a variety of engineered wood products. We believe that “sustainability” means acting in a way that protects the environment, embraces social responsibilities, and builds economic prosperity today and for future generations. PEFC™ and SFI® Chain of Custody (CoC) certified forest management and procurement systems help ensure the wood used in our materials comes from well-managed forests.
