

GREEN BRIEF

LP® SolidStart® LSL can help reduce labor and material costs, as well as the risk of callbacks. It can be used for a variety of applications, including roof and floor beams, door and window headers, wall framing, truss chords, rim board, and stair stringers. LP Solidstart LSL installs like traditional lumber, but is straighter, stronger, and can handle longer spans. LP SolidStart offers grades of up to 1.75E, the industry's highest grade of LSL, and it is backed by a Lifetime Limited Warranty.

LP SolidStart LSL & the Environment

Manufacturing

- LP SolidStart LSL is made from wood – a renewable, natural resource.
- Our wood procurement process targets small, fast growing trees that can be replenished more quickly than larger, older trees.
- We use SFI® certified forest management and fiber sourcing systems to help ensure that our wood comes from well-managed forests. LP SolidStart LSL is certified to the SFI chain-of-custody standard.
- The entire log is used in our manufacturing process. All wood waste is repurposed or used to help fuel our mills.
- We only use low-emitting, safe resins in the manufacture of LP SolidStart LSL, and do not add any urea-formaldehyde.

Product Performance

- Available in grades up to 1.75E, LP SolidStart LSL allows for longer spans. This reduces the number of pieces needed and results in more efficient use of natural resources.
- LP SolidStart LSL may help you achieve certification points in a number of leading green building programs.

Conserve. Create. Renew.

At LP, our approach to the environment can be summed up with three words: conserve, create and renew. As a leader in the building products industry, we view it as our responsibility to be good stewards of the environment and to develop and manufacture products that help builders build better homes.

To us, “green” is about conserving natural resources, creating products that help builders reduce waste, and finding ways to utilize renewable energy sources and reduce waste throughout our operations.

GREEN BUILDING CERTIFICATION PROGRAMS

The use of LP SolidStart LSL may help you qualify for points in leading green building programs. The information below was compiled from relevant sections within each program and is for guidance only. This resource is designed to help you quickly identify areas where you could potentially earn points. Since program requirements vary and details may change, verify qualification criteria with each individual program. For specific questions related to LP products, please call 888.820.0325.

Single Family United States

PROGRAM	CATEGORY	SECTION	ITEM	DESCRIPTION	POINTS
	Resource Efficiency	Quality of Construction Materials and Waste	601.2	Advanced framing techniques optimize material usage.	3
	Resource Efficiency	Quality of Construction Materials and Waste	601.4	Detailed framing or structural plans	4
	Resource Efficiency	Quality of Construction Materials and Waste	601.5 (1) 601.5 (2) 601.5 (3)	90% of system is pre-cut.	up to 12
	Resource Efficiency	Renewable Materials; Biobased Products	606.1.b	Engineered wood	3 to 6
	Resource Efficiency	Renewable Materials; Certified Wood	606.2.e	Sustainable Forestry Initiative (SFI)	3 to 4
	Resource Efficiency	Renewable Materials	606.3	Materials used for major components are manufactured using renewable energy.	2
	Resource Efficiency	Renewable Materials; Resource Efficient Materials	607.1	Engineered wood	3
	Resource Efficiency	Indigenous Materials	608.1	Components used for major elements are extracted, processed, and manufactured within 500 miles.	2
	Indoor Environmental Quality	Pollutant Source Control	901.4 (6)	Low-emitting products	4
	Resources	Structural Frame & Building Envelope; Apply Optimal Value Engineering	D.1.a	Place joists, rafters, and studs at 24OC.	3
	Resources	Structural Frame & Building Envelope; Apply Optimal Value Engineering	D.1.b	Door and window headers are sized for load.	1
	Resources	Structural Frame & Building Envelope; Use engineered lumber	D.3.a	Engineered beams and headers	1
	Resources	Structural Frame & Building Envelope; Use engineered lumber	D.3.c	Engineered lumber for roof rafters	1
	Resources	Structural Frame & Building Envelope; Use engineered lumber	D.3.d	Engineered studs for vertical applications	1
