

GREEN BRIEF

Due to its strength and consistency, LP® SolidStart® Rim Board is ideal for supporting vertical and lateral loads as part of a floor framing system. It is available in OSB, LVL, or LSL, and is more dimensionally stable than lumber. LP SolidStart Rim Board is backed by a Lifetime Limited Warranty.

LP SolidStart Rim Board & the Environment

Manufacturing

- LP SolidStart Rim Board is made from wood – a renewable, natural resource.
- Our wood procurement process targets small, fast growing trees that can be replenished more quickly than larger, older trees.
- We use SFI® certified forest management and fiber sourcing systems to help ensure that our wood comes from well-managed forests.
- The entire log is used in our manufacturing process. All wood waste is repurposed or used to help fuel our mills.
- We only use low-emitting, safe resins in the manufacture of LP SolidStart Rim Board, and do not add any urea-formaldehyde to the product.

Product Performance

- LP SolidStart Rim Board can help builders save time and reduce waste on the jobsite:
 - It is pre-cut to match the depths of your I-Joists, which eliminates the need for field ripping.
 - Because it's consistent and flat, LP SolidStart Rim Board is an ideal surface for siding installation.
 - Its high load capacity may reduce the need for squash blocks.
- LP SolidStart Rim Board may help you achieve certification points in a number of leading green building programs.

Conserve. Create. Renew.

At LP, our approach to the environment can be summed up with three words: conserve, create and renew. As a leader in the building products industry, we view it as our responsibility to be good stewards of the environment and to develop and manufacture products that help builders build better homes.

To us, "green" is about conserving natural resources, creating products that help builders reduce waste, and finding ways to utilize renewable energy sources and reduce waste throughout our operations.

GREEN BUILDING CERTIFICATION PROGRAMS

The use of LP SolidStart Rim Board may help you qualify for points in leading green building programs. The information below was compiled from relevant sections within each program and is for guidance only. This resource is designed to help you quickly identify areas where you could potentially earn points. Since program requirements vary and details may change, verify qualification criteria with each individual program. For specific questions related to LP products, please call 888.820.0325.

Single Family United States

PROGRAM	CATEGORY	SECTION	ITEM	DESCRIPTION	POINTS
	Resource Efficiency	Quality of Construction Materials and Waste	601.2	Advanced framing techniques optimize material usage.	3
	Resource Efficiency	Quality of Construction Materials and Waste	601.4	Detailed framing or structural plans	4
	Resource Efficiency	Renewable Materials; Biobased Products	606.1.b	Engineered wood	3 to 6
	Resource Efficiency	Renewable Materials; Certified Wood	606.2.e	Sustainable Forestry Initiative (SFI)	3 to 4
	Resource Efficiency	Renewable Materials	606.3	Materials used for major components are manufactured using renewable energy.	2
	Resource Efficiency	Renewable Materials; Resource Efficient Materials	607.1	Engineered wood	3
	Resource Efficiency	Indigenous Materials	608.1	Components used for major elements are extracted, processed, and manufactured within 500 miles.	2
	Indoor Environmental Quality	Pollutant Source Control	901.4 (6)	Low-emitting products	4
	Innovation	Other	N.3		up to 4
	Innovation and Design Process	Innovative Design	ID 3.1, ID 3.2, ID 3.3, ID 3.4		up to 4
	Materials & Resources	Material Efficient Framing	MR 1.2, MR 1.3, MR 1.4	Detailed Framing Documents, Detailed Cut List and Lumber Order, and Framing Efficiencies	up to 5
	Materials and Resources	Environmentally Preferable Products	MR 2.2	Local production. Use products that were extracted, processed, and manufactured within 500 miles of the home.	1/2 pt
	Waste Management	Construction Waste Management	MR 3.2		up to 3
	Resource Efficiency	Resource Efficient Design	RE 1		TBD
	Resource Efficiency	Advanced Framing Materials	RE 2.2	Engineered floor framing	1
	Resource Efficiency	Advanced Framing Materials	RE 2.9	Engineered roof framing	1
	Resource Efficiency	Local, Recycled, and/or Natural Content Materials	RE3	Use building materials extracted, processed, and manufactured within 500 miles of site.	3
	Innovation	Project Specific Innovation Points	IN 1.3		TBD
