

- Potentially Reduces Waste And Labor Time
- May Help Meet Code In Wind And Seismic Zones
- 20-Year Transferable Limited Warranty

A Smart Option to Building Taller Walls

Many of today's homes have ceilings over eight feet tall, so builders need wall sheathing that can reach those heights. LP® LongLength™ OSB Sheathing is engineered specifically for vertical installation in tall wall applications. With length options up to 10 feet, LP LongLength sheathing may help reduce building costs compared to standard 4' x 8' sheathing because it may require fewer panels to get the job done. It may reduce the need for additional cutting, blocking, or filler strips, so you are spending less time and reducing waste on the job site. Plus, there may be fewer seams, which helps create a tighter building envelope.

Check local building codes for requirements in your area.

The Product You Need, When You Need It

LP is a leader in producing OSB and strand technology across a variety of engineered wood products. Having a large manufacturing footprint helps ensure that LP LongLength OSB Sheathing is available where and when you need it. And when you use LP products, you have access to some of the best technical, sales, and customer service resources in the industry.
