

LP Sustainable Fiber Sourcing Policy

Louisiana-Pacific Corporation (LP) believes that sustainably managed forests make a vital contribution to the world by providing economic, environmental and social benefits indispensable to the quality of life. Our commitment to provide these benefits is reflected in our daily actions across all of our operations. LP applies sustainable forestry principles and objectives to meet the needs of the present without compromising the ability of future generations to meet their own needs. Accomplishing sustainable forestry requires a commitment and partnership among forest landowners, wood fiber suppliers, the forest product industry, the scientific community and other stakeholders.

LP's Commitment to Sustainable Forestry Principles and Objectives

- LP utilizes a variety of forest management and fiber sourcing practices that promote the sustainability and multiple use of forestlands.
- In our forest management and fiber sourcing decisions, LP will consider the following: forest health and productivity; protection of water resources; conservation of biological diversity; aesthetics and recreation; protecting special sites, compliance to laws and regulations, and the efficient use of fiber resources.
- We support efforts to protect private property rights and the ability of private landowners to sustainably manage their forestlands.
- On the lands where we purchase fiber, but do not own or control the land, we will promote sustainable forestry practices.
- We are committed to supplying sustainable forestry information to landowners or their agents, *wood producers*, customers and others with interest in responsible forest management or sustainability.
- We will provide support (internally or through cooperative efforts) for research to improve the health, productivity and overall management of forests.
- We are committed to the current Sustainable Forestry Initiative, Inc.® (SFI®) Forest Management and Fiber Sourcing Standards.
- LP communicates this commitment to sustainable forestry throughout all levels of the company and to landowners, *wood producers*, customers and other stakeholders with whom we do business.

LP and its employees are committed to the Sustainable Forestry principles as outlined in this policy.
