

SOLIDSTART[®]

ENGINEERED WOOD LSL

Garage Door Headers

- 3-1/2" thickness provides one piece header with no build-up required
 - Cost effective alternative to comparable LVL products
 - Long lengths can allow continuous framing over garage return walls in high wind and seismic areas
 - True 3-1/2" thickness compared to 3-1/8" glulam
- Recommended Grades: 1.55E and 1.75E
 - Recommended Depths: 11-7/8" , 14" , 16"
