

SOLIDSTART®

ENGINEERED WOOD LSL

Rim Board

- Additional strength makes it ideal for high vertical and lateral load applications in multi-story construction
- 1-1/4" thickness LP SolidStart LSL rim board meets IBC fire blocking requirements
- Ideal in seismic and high wind applications with greater fastener capacity than other products
- Eliminates the need for on-site ripping
- Matches LP SolidStart I-Joist depths
- Recommended Grade: 1.35E
- Recommended Depths: 9-1/4" – 24"
- Recommended Thicknesses: 1-1/4" , 1-1/2"
- Recommended Lengths: 16' , 18' , 20'
